

2021 Patent Infringement Risk Search – Biotech/Life Sciences

INSTRUCTIONS

Prepare and conduct a search. Try as much as possible to describe the steps you take to acquaint yourself with the topic of such a search. Describe how you find and use the necessary information in devising the search query. Your reasons for NOT including certain aspects may also be of importance. Keep a record (history) of the search you conduct in the database of your choice. Explain any factors other than the technical topic that will have an effect on the search. Be as detailed as possible in describing your approach to the search including devising the search strategy, the choices you make in devising the strategy, the database syntax you use and what it means, the results you pick.

The majority of the marks will be awarded for the explanation you provide about devising and finalising your search strategy. Do not stop if you find a seemingly perfect hit, as by finishing early you might not earn enough marks to pass. There is no perfect set of results.

You can upload multiple files, but please be aware that you cannot upload more than a maximum of 10 Megabytes for all uploaded files in total. Should the total size of all your files exceed this limit, try to compress the files so that the total of all of the files to be uploaded is under 10 MB (please note zip files cannot be uploaded). Please make sure that your file is compatible with Word / Excel 2007 up to and including Office 365. For example, using Open (Libre-)Office there are options to save such a file as e.g. "Word 2007 – 365 (docx)". There are similar options in other text processing / spreadsheet programmes. In the event that you experience difficulty in uploading your files, but only then, you may send them by email to exam@qipip.org with an explanation of the problem **WITHIN the allotted time**.

CASE STUDY

A company will launch a pharmaceutical composition, which is composed of: Ginkgo biloba P.E (70%), which is the extraction from Chinese traditional medicine Ginkgo, and a chemical compound 4-Ethoxy-2-methyl-5-(4-morpholinyl)-3(2H)-pyridazinone (26%), and some inorganic substances, including Calcium carbonate (2%), Sodium chloride (2%).

The medicine composition is prepared into dripping pills, and the main adjuvant material is polyethylene glycol 6000.

The medicine can be used to treat cardiac disease.

Now, the company wants to launch the medicine in China, Japan, United States and Germany. They want to launch the product before the 1st of August 2021. They ask you to conduct a patent infringement risk search.
